6 October, Giza

SUMMARY

I am a backend developer with 3 years of experience in Laravel and MySQL. I focus on developing and maintaining robust and scalable systems, managing databases, and implementing RESTful APIs. I also deal with performance optimization, security, and troubleshooting to ensure high-quality web applications and also have extensive experience in front-end.

EXPERIENCE

Back-End Developer 07/2021 - Present
Freelancer at Mostaql.com ↗

- Develop and maintain applications and websites using Laravel and MySQL.
- Implemented RESTful APIs for seamless integration between frontend and applications.
- Managed database operations, ensuring data integrity and optimal performance.
- Improve system performance and enhance security measures.
- Troubleshoot issues to deliver high-quality, reliable web applications.
- Working as a freelancer and submitting more than 30 projects from scratch.

Part time Back-End Developer 02/2021 - 01/2023
Waset Online Company ↗

- I worked as a person responsible for fixing PHP programming errors and server-side issues.
- Creating and developing an API to provide all the company's services and converting them into mobile applications
